2008 Weather Review

Above normal snow pack, late melt off and below normal to normal temperatures during the 2008 fire season created an unusually quiet fire season across Eastern Great Basin.

Winter 2007-2008

Winter across Eastern Great Basin proved to be quite wet, with December-February being the 11th wettest winter for Utah in 113 years. Idaho, Wyoming and Arizona were among the top 25 wettest in their respective records. Snow pack peaked at between 120-150 percent of normal over most of the area.

March – June

Despite a dry March and April, snow pack continued at or above 100 percent of normal as temperatures remained below normal for the region through June, significantly slowing snow melt.

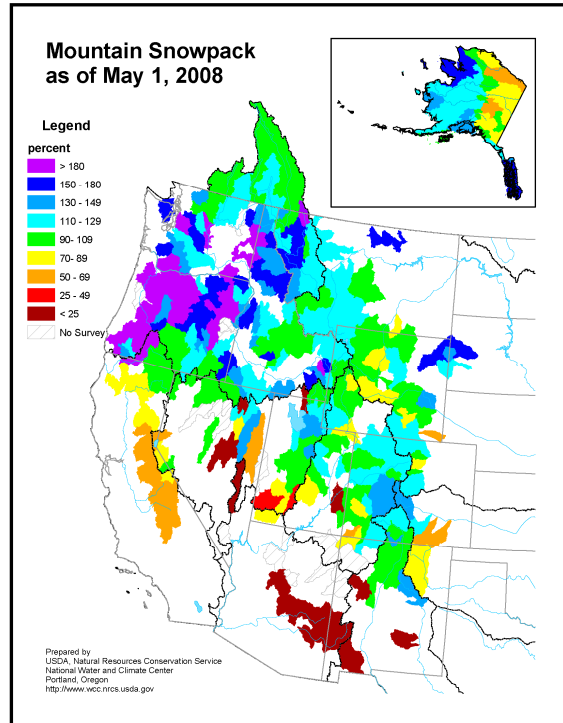

July – August

Moisture moved into southern/eastern Utah in mid July decreasing fire danger.

Semi frequent dry cold fronts pushed through the northern half of the Great Basin during July and August keeping temperatures near normal, while somewhat suppressing moisture from moving north into the area.

September - October

The fall months continued mostly warm and dry, but with fire occurrence and behavior remaining low.

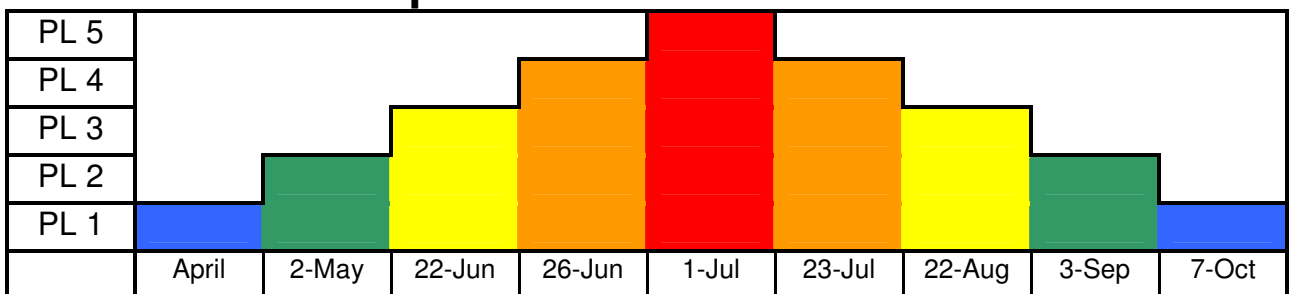

Preparedness Level Review

Fire season started slower than usual jumping from Preparedness Level one to Preparedness Level three on June 15. May and June were quiet while July provided a steady stream of initial attack across most of the fire zones.

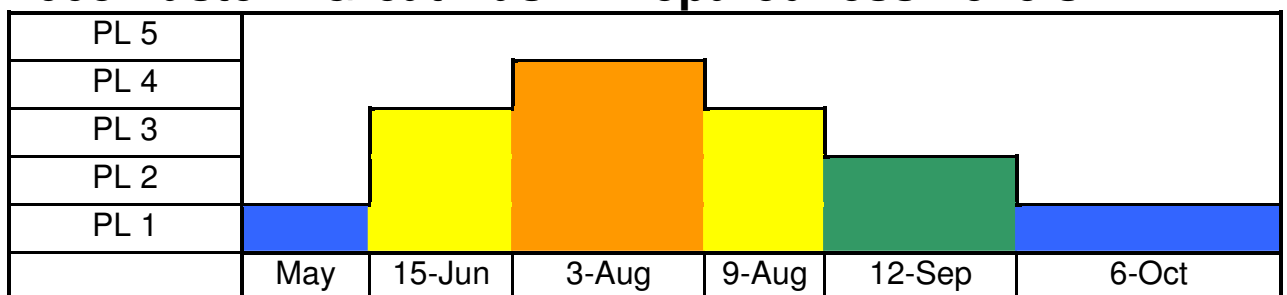

Eastern Great Basin stayed in Preparedness Level three until August 3rd when fire activity caused a move to Preparedness Level four. This, however, was short lived and the decline of fire starts and fire activity caused a return to Preparedness Level three on August 8.

By mid-September fire activity again slowed and Eastern Great Basin returned to Preparedness Level one on October 6th. Nationally, Preparedness Level five was declared for only 22 days, with Eastern Great Basin not exceeding Preparedness Level four.

2008 National Preparedness Levels

2008 Eastern Great Basin Preparedness Levels

2008 Season Review

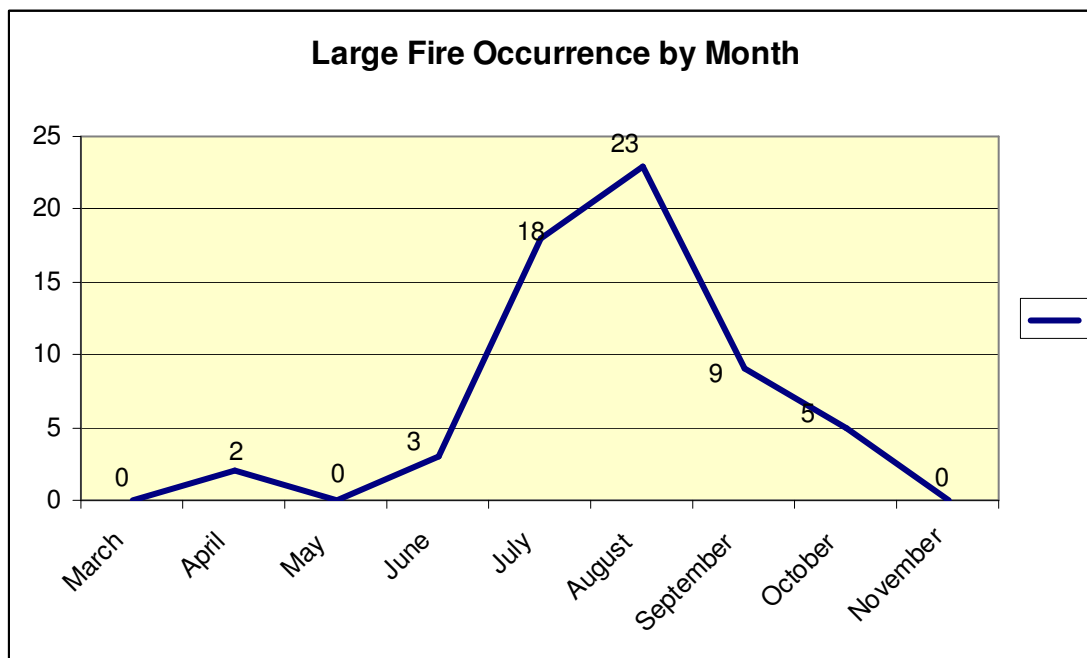

The 2008 fire season was a relatively quiet one, caused by a cool, wet spring and early summer, which delayed green up and the curing of fuels into late July and August.

Lightning caused fires totaled 835 starts for 25,321 acres. Human caused fires totaled 826 starts for 120,391 acres.

Utah had the most fire starts with 999 ignitions, with Utah State/Private agencies having 425 of the total. Idaho burned the most land, charring 105,050 acres with the Idaho BLM burning 61,250 of that total.

The first large fire within the Eastern Great Basin occurred April 13th on Fort Hall BIA lands in Idaho. The first Type 2 Team mobilization occurred June 16th on the Dixie National Forest in Utah. The last large fire of the season occurred October 28th in Utah on Northwest State lands. A break down of large fires by month is found below.

March	April	May	June	July	August	September	October	November

MAC Group / NIMO / Area Command by State/Agency

The Great Basin Multi-agency Coordinating (MAC) Group was not activated during the 2008 fire season. Neither NIMO nor Area Command was ordered for any units in Eastern Great Basin for the 2008 season.

Summary of Agency Totals by State

The following charts and graphs describe the break down of fire activity by State and Agency showing the total number of fire starts and the total numbers of acres burned for the calendar year of 2008.

	Arizona		Idaho		Utah		Wyoming		Total

<i>Muir Total Days Out</i>					14
Total Days Out					46

Out of Area Type 1 Incident Management Teams

There was not sufficient fire activity to warrant ordering Out of Area Type 1 Incident Management Teams into Eastern Great Basin for the 2008 fire season. Summerfelt's team is part of the Rocky Basin rotation and they were dispatched to Western Great Basin area for one 14 day assignment.

TEAM	INCIDENT NAME	INCIDENT NUMBER	DATE ASSIGNED	DATE RELEASED	TOTAL
Summerfelt	East Side Rock Ridge	NV-HTF-040186	8/22/2008	9/5/2008	14
<i>Summerfelt Total Days Out</i>					14
Total Days Out					14

Type 2 Incident Management Teams

Great Basin Type 2 Incident Management Teams were mobilized 14 times in 2008. The total number of days spent on fire assignment in the Great Basin was 36 out of a total of

116 days. The largest amount of days and assignments were in support of wildland fires in California with 6 mobilizations for 69 days committed.

Out of Area Type 2 Incident Management Teams

There was not sufficient fire activity to warrant ordering Out of Area Type 2 Incident Management Teams into Eastern Great Basin for the 2008 fire season.

Fire Use Management Teams

The Great Basin Fire Use Management Teams had eight assignments, five being within the Great Basin and the remaining three to California. The Teams of Ourada/Soper and Svalberg/Dykehouse were split for several assignments within the Great Basin due to availability and need.

Great Basin Fire Use Management Team Assignments

TEAM	INCIDENT NAME	INCIDENT NUMBER	DATE ASSIGNED	DATE RELEASED	TOTAL
